

ISA100 Wireless™ Stack Conformance Test Kit

Description

The ISA100 Wireless Stack Conformance Test Kit verifies the correct communication behavior of a stack as defined in the ISA100 Wireless implementation specification. This product enables users to determine if a stack conforms to WCI's official registration testing regimen. And it is an excellent tool for troubleshooting, debugging, and regression testing ISA100 Wireless stacks and products.

Features

- Conformance error reporting
- Automated test scripts
- Customizable test cases
- Easy set-up and operation
- Tests devices and stacks

Components

- Script server and software
- Test script source code and technical documentation
- Four (4) diagnostic backbone routers
- Reference device under test
- Ethernet router

System requirements

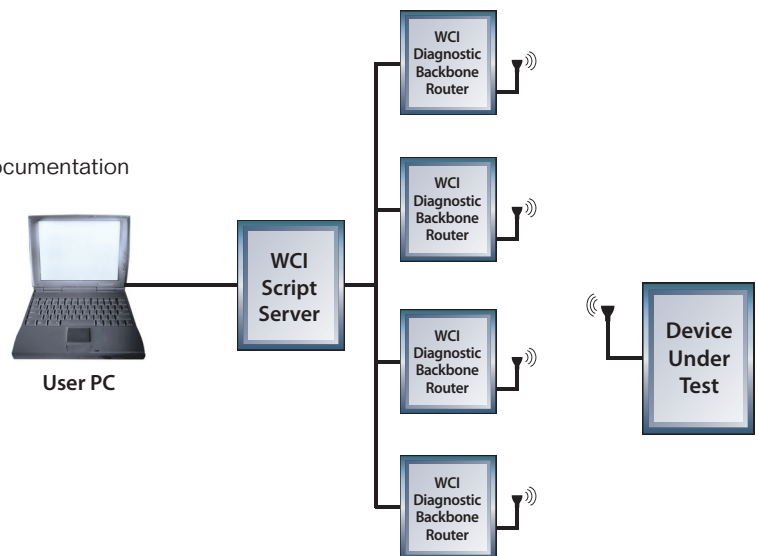

- PC with web browser

Part Warranty

- One (1) year from date of delivery

About the ISA100 Wireless Compliance Institute

Comprised of industry leaders from major manufacturing and automation control system users and suppliers, WCI was formed to decrease the time, costs, and risks of developing and deploying standards-based, industrial wireless devices and systems. WCI has established a collaborative industry-based program among users, suppliers, and other stakeholders that conducts independent testing and certification of ISA100 standards-based devices and systems. The program also provides education, tools, and technical support to users and suppliers, accelerates adoption of the ISA100 standards, and assures interoperability. For more information about the ISA100 Wireless Compliance Institute, visit www.isa100wci.org.
