

ISA100 Wireless™ Device Conformance Test Kit

Description

The ISA100 Wireless Device Interoperability Test Kit verifies the correct communication behavior of wireless devices as defined in the ISA100 Wireless implementation specification. This product enables users to determine if a device conforms to WCI's official registration testing regimen. And it is an excellent tool for troubleshooting, debugging, and regression testing any ISA100 Wireless product.

Features

- Conformance error reporting
- Automated test scripts
- Customizable test cases
- Easy set-up and operation

Components

- Script server and software
- Test script source code and technical documentation
- Diagnostic backbone router
- Reference device under test
- Ethernet router

System requirements

- PC with web browser

Part Warranty

- One (1) year from date of delivery

About the ISA100 Wireless Compliance Institute

Comprised of industry leaders from major manufacturing and automation control system users and suppliers, WCI was formed to decrease the time, costs, and risks of developing and deploying standards-based, industrial wireless devices and systems. WCI has established a collaborative, industry-based program among users, suppliers, and other stakeholders that conducts independent testing and certification of ISA100 standards-based devices and systems. The program also provides education, tools, and technical support to users and suppliers, accelerates adoption of the ISA100 standards, and assures interoperability. For more information about the ISA100 Wireless Compliance Institute, visit www.isa100wci.org.
