Case Studies

Adoption of Wireless for Safety

Brandon Gust – Honeywell
Case Studies

Honeywell
- Time Critical Perimeter Monitoring
- Tank Farm Safety Compliance
Case Study 1
Perimeter Monitoring – Time Critical

LNG Facility in Middle East - Brownfield

**Challenges**
- Alarming system for detection of gas leaks without extensive cabling.
- Meet 3 seconds alarm requirement.

**Solution**
- FDAP based ISA100 Wireless network with XYG6000 Universal Transmitters and solar power panels.

**Results**
- Improved site safety system within budget.
- 3 seconds alarming requirement met.
- Compliance to government regulations for HSE.
• OneWireless Adapter can be used with HART enabled sensors like the Honeywell Analytics XNX.

• Any fixed or portable gas detection device with a 4-20 mA output can use a Universal I/O transmitter.
Remote antenna

Honeywell XYR 6000 Universal I/O wireless transmitter featuring both DI and DO

“…requirement for the end to end cycle of the moment of detection of fire and gas until the moment of activation of the sounders and beacons, as well as with absence of line power.”
Project FAT Results

- FAT successfully completed March 2014.

- The wireless solution consistently delivered an activation time of 2.9 seconds with the horns and beacons activating simultaneously.

- The system met and exceeded the stringent customer requirement of 3 seconds.

- The customer put the system through rigorous tests that were beyond the scope of the FAT, to display redundancy, fail-over and network stability.

- The wireless system withstood all their tests and attempts to show flaws and displayed its resilience and ruggedness.

- The system has been installed and commissioned at the customer site in June 2014.

OneWireless Terminal Solution

- Tank gauging
- Overfill alarming
- Process monitoring
- Floating roof monitoring

- Gas Leak Monitoring
- Safety Shower Monitoring
- Vibration Monitoring
- Valve Position Monitoring
- Personnel Safety Monitoring
- Mobile Applications
- Remote Area & Perimeter Video Monitoring

Wireless applications beyond tank gauging
Case Study 1: Solar powered gas leak detection. With ISA100 Wireless, Honeywell was able to meet the “near real-time” alarm requirement of 3 sec to comply with government regulations.

Case Study 2: Improve safety with secondary tank gauging. Multiple Brownfield locations, difficult to wire. ISA100 Wireless enables Honeywell Enraf to communicate wirelessly.

With ISA100 Wireless Standard, Honeywell is able to design and integrate a wide range of devices including other wireless manufacturers devices.
